SAFETY = PEACE OF MIND

EXTRA VISUAL GUIDANCE

Traffic signalisation, skirt lighting, yellow comb segment, step demarcations provide extra visual guidance for passengers to help them to have a smoother and safer ride.

DOUBLE SKIRT BRUSHES

to reduce even more entrapment risk

FIRE SAFETY

maximised with halogen-free.

SKIRT PANELS

coated with anti-friction coating minimise drag and reduce possibility of entrapments between skirt and steps.

FALL PROTECTION AND ANTI-RIDE BARRIERS

increase passenger protection and prevent falls and misuse of the unit.

COMB PLATE IMPACT DEVICE SWITCHES

minimise the risk of entrapment in comb plate areas.

ANTI SLIP REQUIREMENT

R10 anti-slip grade step surface reduces the chance of passengers slipping.

KONE 24/7 CONNECTED SERVICES

helps you to see the status of the escalator in real time to ensure safe operation.

AUDIBLE ALARMS

provide clear guidance on escalator travel directions and enlarge users attention.

ESCALATOR SUSTAINABILITY

Installing an eco-efficient KONE escalator solution can help in achieving green building accreditations such as LEED or BREEAM certification.

BREEAM CERTIFICATION

One credit can be achieved by fulfilling the following requirement:

Escalator is fitted with a passenger-sensing device for automated operation, so it operates in standby mode when there is no passenger demand

LEED CERTIFICATION

KONE solutions can also contribute to several LEED certification categories.

ECO-EFFICIENT ESCALATOR

KONE TravelMaster™ 110 has achieved A+++ energy performance certificate based on ISO standard.

4 WAYS TO MAKE YOUR ESCALATOR MORE ECO-EFFICIENT:

- High efficiency motors minimise energy consumption at full speed.
- Lubrication-free step chain means no oil, a cleaner escalator and environment, reduced fire hazard, simpler cleaning and easier maintenance.
- Long-lasting LED lighting is up to 80% more efficient than fluorescent lighting and lasts up to 10 times longer.
- Eco-efficient operational modes save energy by slowing down or stopping the escalator completely when traffic is low. For example, when an escalator is empty, energy consumption is further reduced by slow stand-by speed and furthermore by stopping the escalator.

KONE holds the EcoVadis Gold medal for its sustainability performance, being in the top 3% of all the assessed companies. The **EcoVadis** rating covers a broad range of non-financial management systems including environmental, labor and human rights, ethics, and sustainable procurement impacts.

KONE has been recognized by CDP for its actions towards reducing emissions, mitigating climate risks, and developing a low-carbon economy. KONE achieved a place on **CDP's prestigious A List** signifying that we rank among a small number of high performers.

KONE has been recognised as one of the best employers in the world by Forbes business magazine on their **Forbes 2022 World's Best Employers list**.

FLEXIBILITY TO MATCH YOUR BUILDING REQUIREMENTS

KONE TravelMaster™ TM110 is a commercial escalator designed to satisfy all needs of a customer in the retail environment. It is engineered to maximise the shopping experience for your end users, guaranteeing the perfect combination between safety and visual appearance.

Seismic Provisions

For seismic environments a full proposal of different mountings are available, to match even the strongest conditions.

Flexible Features

KONE TravelMaster™ 110 escalators are designed to fit all your needs, from parking places to central halls. KONE engineering capabilities will help you to fulfill your specifications in the best possible way.

Tailor-Made Possibilities

The renowned engineering and design capabilities are always available to realise the architectural vision with customised specifications for your premises.
