INTELLIGENT SERVICES ARE HERE

KONE CARE™ 24/7 CONNECT
KONE, in cooperation with IBM, has made elevators and escalators smarter. By connecting them to the cloud we can collect vast amounts of data – monitored, analysed and displayed in real time through the IoT platform Watson. This way we can tailor a perfect maintenance plan for each individual piece of equipment, improving equipment performance, reliability and safety.

KONE CARE™ 24/7 CONNECT

With KONE Care 24/7 Connect, we can now better predict, maintain and take action before equipment breakage. For you, this means improved safety, full transparency and ease of mind. Because if something were to happen, we’d already know.

ADDED INTELLIGENCE – IT’S PREDICTIVE
Using the latest technology, the elevators can now speak their minds and keep technicians one step ahead of what’s happening. The result? Fewer malfunctions, faster repairs and greater peace of mind for you.

ADDED SAFETY – KEEPING WATCH 24/7
Elevators are on duty 24/7, and so are we. If a problem occurs, detailed information tells us what’s causing the issue and how urgent the matter is. By keeping watch round-the-clock, we can respond quickly in case of sudden malfunctions.

ADDED TRANSPARENCY – YOU’LL STAY IN THE KNOW
If critical faults are detected and a technician is alerted, you’ll be informed immediately. When you’re fully aware of what’s going on, you can plan ahead and budget for future maintenance needs.
WHAT IT MEANS FOR ME

When a lift is down, the whole building is impacted. My premium tenants expect reliability.

I need to have transparency and up to the minute reporting to keep them updated and informed.

– Building Manager

Every second in our facility is key and our patient movement relies on elevators. I can’t afford to have breakdowns.

I need reliability and I need to have real-time insights into the health of my assets.

– Facility Manager

COMMERCIAL
THE BEST POSSIBLE EXPERIENCE

CHALLENGES
Elevator downtime creates a poor tenant experience. We need reliable, top-quality elevator performance to attract and retain premium tenants and add to the building value.

BENEFITS
• A smooth, safe and seamless user experience that reflects the premium grade of your asset.
• Problems are identified and solved before they cause any disruption to the tenant’s experience.
• If a problem does occur, KONE is immediately notified and can quickly dispatch a technician to repair the elevator.

HEALTHCARE
SECURE PATIENT FLOW

CHALLENGES
A properly functioning elevator can make the difference between life and death - we need reliability by ensuring any issues are identified and fixed well before they reach a critical stage.

BENEFITS
• You can rely on uninterrupted patient flow and a smooth staff and visitor experience.
• Proactive monitoring and analysis to ensure reliable facility operations.
• If a critical issue is identified, a technician will be dispatched for immediate attendance.
WHAT IT MEANS FOR ME

Customer experience and comfort is paramount. My retailers and their customers expect a smooth and seamless experience in my centre. I need targeted and tailored maintenance to match the traffic needs of my equipment.

– Centre Management

My tenants can contact me at any time. Having visibility across my portfolio is key to being responsive. As a busy strata manager, I need a convenient and easy way to monitor all my properties in real-time.

– Strata Manager

RETAIL
UNINTERRUPTED REVENUE FLOW

CHALLENGES
Attract and retain retail tenants and customers while protecting against potential liabilities. Maintaining reliable operations prevents equipment breakdown which leads to lost revenue and penalties.

BENEFITS
• An uninterrupted and safe flow of people helps to ensure revenue for retailers.
• If an immediate service need does occur, KONE is immediately notified and can quickly dispatch a technician to repair the equipment.
• KONE Online puts equipment statistics at your fingertips, giving you real-time insights into the use of your escalators and elevators.

RESIDENTIAL
FOCUS ON THE FUTURE

CHALLENGES
Tenants expect a seamless and comfortable elevator trip when they get home. Disruptions, particularly when there is only one elevator, not only leaves tenants dissatisfied, but can lead to higher strata costs for tenants and lowers the perception of the building quality.

BENEFITS
• Less time spent dealing with elevator breakdowns and resident’s complaints means more time to focus on more strategically important tasks.
• Problems are identified and solved before they cause any disruption to a resident’s day.
• Resident’s quality of life and building accessibility are maintained and improved.
Information on the key operating parameters, usage statistics and faults is sent in real time to KONE’s cloud service, where the analytics are located.

The data is processed by an advanced analysis system – IBM Watson IoT. The system then identifies whether it needs maintenance, further investigation or immediate attendance by a technician, depending on how critical the problem is.

Your service technician receives information on the equipment’s service needs and conducts the service either right away (for critical issues), or during the next maintenance visit (for non-urgent issues).

We send you clear notifications and report all of the actions we take to keep your equipment running safely and smoothly.
WHAT DO I GET WITH KONE CARE™ 24/7 CONNECT?

INSIGHTS INTO THE HEALTH OF YOUR ASSETS
Trustworthy, real-time data and insights on your asset health and maintenance needs.

TARGETED AND TAILORED MAINTENANCE
More targeted and tailored maintenance service based on the actual condition of your equipment.

NOTIFICATIONS AND REPORTS
Summary of your connected equipment portfolio and equipment status, and information on any urgent issues.

BETTER TRANSPARENCY
Using our new digital channels, you and your team will stay up-to-date on both equipment and maintenance work status at all times.

KONE MOBILE APP
Real-time updates on the go
- Ongoing service orders and status of the equipment
- Keeps you one step ahead – have answers before you receive complaints
- Quick access to KONE contact information

KONE ONLINE
Equipment information based on data
- Actions we have taken based on observations from intelligent equipment analytics
- Current equipment status and previous events
- Equipment usage information: trend and levels in the usage of your equipment
KONE provides innovative and energy efficient solutions for elevators, escalators, automatic building doors and the systems that integrate them with today's intelligent buildings. We support our customers every step of the way; from design, manufacturing and installation to maintenance and modernisation.

KONE is a global leader in helping our customers manage the smooth flow of people and goods throughout their buildings. Our commitment to customers is present in all KONE solutions. This makes us a reliable partner throughout the life cycle of the building. We challenge the conventional wisdom of the industry and we are dedicated to improving the flow of urban life.

We are fast, flexible, and we have a well-deserved reputation as a technology leader, with such innovations as KONE MonoSpace® and KONE UltraRope®.

KONE employs over 55,000 dedicated experts to serve you globally and locally. We have a team of over 1,500 staff around Australia and New Zealand.
