

The main image shows an elderly man with glasses and a cap sitting in a wheelchair. He is smiling and looking at a smartphone. A young woman in a yellow jacket stands behind him, also smiling and holding the wheelchair's handle. They are outdoors on a paved area with buildings in the background.

DESIGNED FOR CARE,
BUILT FOR DEPENDABILITY

THE ESSENTIAL LIFT FOR YOUR COMMUNITY

From aged care to childcare and community centres, the new KONE Essentials™ – Community Lift has been engineered specifically for ease of use and reliability.

WHY KONE?

Our optimised, end-to-end design solution provides everything you need to get your next community project moving.

Affordable without compromising on quality. Our solutions are value-engineered to match the needs of your next project.

Trusted and proven methods. Our installation teams are experts at ensuring your project runs quickly and efficiently.

Health and wellbeing focused. Our products can come with specially developed health and wellbeing options to keep your community healthy and moving

Support that speaks your language. Our Customer Care Centre is available 24 hours a day to handle any issues that may arise

Your community's local lift experts. With teams spread across New Zealand, we can handle everything from installation to maintenance and beyond.

Focused on sustainability. KONE technology not only means that we are focused on reducing our impact on the planet, but providing solutions for your building that can reduce your energy usage by up to 35%

Robust and stylish materials. Need something built to easily withstand public use and look good doing it? We've got you covered.

24/7 Connected Services can now better predict, maintain and take action before breakage. For you it means improved safety, full transparency and ease of mind, because if something were to happen, we'd already know.

YOUR COMMUNITY

Aged Care/Clinic/Retirement Living

Caring for older and less mobile users in your community means we need to provide reliable, smooth and comfortable journeys. Our lifts:

- Provide clear announcements and signals
- Have easy to use buttons
- Are able to accommodate wheelchairs and stretchers
- Offer specific features, including emergency override and buffer rails

Childcare

Creating a safe environment built with reliable and durable materials is key for childcare facilities. Our lifts are designed to be up to the challenge of busy childcare facilities and we offer materials that keep the elevator looking great and running smoothly.

- Door safety to stop little fingers getting trapped
- Quick door opening times so you can grab the discarded shoe
- Option to add card reader that is easily accessible to make getting into secure areas easy and stress free
- Ability to cater to all children's needs and abilities (wheelchair compliant)

Sports/Leisure

Hard wearing and durable materials are designed to withstand frequent users from indoors to outdoors. With a large 1,200kg car capacity, you'll be able to move people quickly throughout the facility and our through-car options mean you have.

- Hard wearing finishes to allow for transport of sports equipment without worrying about the longevity of your lift
- Large 16 person (1,200kg) lift capacity to hold the whole sports team
- Long lasting durable doors

Community Clubs

Community clubs are places we go to connect so we've designed these elevators to easily blend with the decor of your building. The proven quality of KONE lifts means that you can trust your building users will always get to their destination feeling refreshed!

- A variety of quality finishes so your lift can blend seamlessly into your decor
- Our intuitive and easy to read elevator signalisation means it's simple to use, for all visitors and guests
- Fast and seamlessly transitions from the outside world to your club meaning customers can arrive quickly and relaxed

KONE wants everyone to be able to get to where they're going safely which is why KONE Essentials™ lifts provide a selection of materials, accessories and components that meet rigorous local and national standards, so no one is left behind.

- EN81-20:2014
